PROJECTS

WEATHER APP | HTML/CSS, Javascript, React, Tailwind CSS

Link to project repo: [Github.WeatherApp](#)

- Developed a weather application using React as the frontend
- Fetches data from OpenWeatherMap's API to display relevant weather/forecast info
- Implemented search bar for users to search for any given city, country etc.

WEBSHOP | PHP, MySQL, Javascript, Tailwind CSS

Link to project repo: [Github.Webshop](#)

- Developed a full-stack web application using PHP
- Established a working connection to a database through MySQL
- Added a working login and register page with built-in validators
- Added an admin page for adding, removing and editing products
- Added a home page where products are displayed

LEMONADE STAND | HTML/CSS, React, Tailwind CSS

Link to project repo: [Github.LemonadeStand](#)

- Developed a digital lemonade stand application using React as the frontend
- Fetches data from TheCocktailDB API to display every product tagged "Lemonade"
- Added a carte of selected products that calculates the total price
- Added an admin page for adding, removing and editing products
- Added sort by name and price function
